

BULGARIA ANCIENT LAND OF THRACES BUT ALSO LAND OF ROSES

More than one of Eastern European countries, Bulgaria is primarily a country of Southern Europe. Neighbouring of Serbia, Greece, Romania and Turkey, it is at the same latitude as Marseille, Toulouse and Rome. Located in the heart of the Balkans, it offers an incredible diversity of landscapes, it is also known worldwide for its beautiful "Rose Festival" held each year in early June and attracts tourists worldwide. Located at the crossroads of several civilizations, Bulgaria has kept the traces of different cultures, as evidenced by its archaeological heritage: cave paintings, rich tombs dating from the civilization of the Thracian, gold treasures, Greek and Roman remains...

From the Thracian civilization that marked the Balkan Peninsula with its splendour and its artistic masterpieces, through the Roman Empire, there is already enough to dazzle you. Then came the conversion to Christianity of Boris I and the adoption of the Cyrillic alphabet which will make the powerful Bulgarian kingdom lighthouse of the Slavic culture in the Middle Ages. But do not forget that the history of this land, envied by many civilizations, has left in heritage a rich cultural and artistic trail of poignant truths and legends.
